W

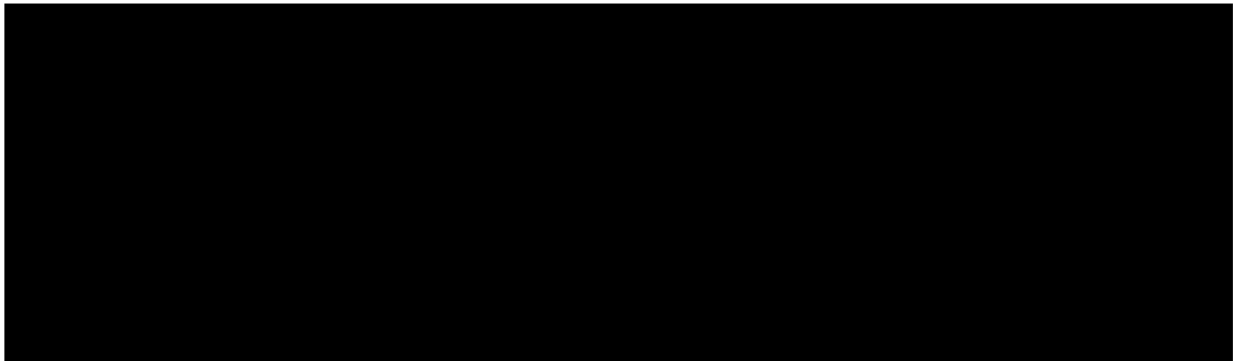

DIARY NOTES

DD/S

29 November 1965

1. The DCI called a special meeting of the Deputies to discuss a change in our format of reporting to the President in order to ensure that while the President is at the Texas ranch he is getting adequate information on current and developing intelligence activities and information.

25X1A

3. The question of the bill from [REDACTED] for the transportation of the Director's furniture came up and apparently no bill has yet been received. We have been in touch with [REDACTED] and I directed that Logistics enter the picture to see if this issue has been settled as it has been bothering the Director and we should relieve him of this problem. It was agreed on 13 April (Colonel White's Diary Notes) that we would pay for the movement of the furniture including any excess over the normal allowance. I directed that any necessary papers be produced if specific authorization for this purpose is necessary.

4. The DCI noted a flashing light on the horizon and asked what its purpose was. Security later identified the light as a part of the DCA communications system. Security prepared a special paper on this subject.

25X1A

5. On this date, Colonel White, Emmett Echols, and I had lunch with [REDACTED] followed by a discussion of Agency problems of increasing age in senior management and the retirement programs. NSA realizes now that they have a problem and are preparing a program. We advised of our Career Trainee program in which they were extremely interested.
